Toronto Protest 1-3 pm.  
City Hall (NPS)**

Sheraton Centre Toronto Hotel  
123 Queen Street West  
Toronto, ON M5H 2M9  
capacommittee@gmail.com

ELECTROSHOCK (Electro-convulsive therapy – ECT): Up to 400 volts of electricity is passed through the brain for up to 8 seconds until the brain has a massive epileptic seizure. Generally given two to three times a week for around 6 weeks and then perhaps once a month after that, often without consent. Causes brain bleed and cell death resulting in memory loss and cognitive deficits. Other adverse effects are stroke, heart attack, broken teeth, headache, epilepsy and death (1 in 200 of the elderly).
