Hearing Voices Group

2017

Hearing voices does not necessarily mean a person is ill. But it can lead to becoming isolated and misunderstood - and for any of us that can certainly result in becoming very ill indeed...

We envision and enact a society that understands voice hearing, supports the needs of individuals who hear voices and views them as full citizens. This type of society is not only possible but is already on its way

Eleanor Longden

It's not just about "voices"...

If you sometimes...
hear voices, see things,
smell things, feel things,
sense things or think
things
that others don't...
and when you try to talk
with them about it,
they get *their* freak on...
-then you're welcome,
because we do too.

then you may want to try
the Hearing Voices Café –
it's for everybody...

emancipate

I believe the hearing voices approach is emancipatory because it offers us new roles, not only for a person who hears voices but new roles for family members and supporters and new roles for workers, too ...

Ron Coleman

300,000,000

Research shows that 4% to 15% of humans hear voices... including Doctors... by even a conservative estimate that's this many
